

The intelligent touch screen remote

The ProntoNEO provides a single home theater solution, allowing you to integrate your current remote controls into one simple device. This cost-effective control solution for all your audio and video devices is customizable to the needs of you and your family.

Single solution for any device of any brand

- Extensive infrared code database for any device or brand
- Learn any IR code from another remote by pointing to it
- Programmable hard buttons for access to popular functions

Fully customizable user interface

- Grayscale LCD displays realistic, easy to see buttons
- Perform multiple commands with one touch of a button
- On-device editing to customize the remote's user interface
- PC software to create your own user interface

Ease of use

- LCD screen has backlighting for convenience in the dark
- Cursor keys simplify navigation through on-screen menus
- Digital Contrast Control button optimizes viewing clarity

- Flash Memory Size: 1 MB

Infrared capabilities

- Operating Distance: 33 ft (10 m)
- Learning IR Codes: yes
- Learning Frequency Range: up to 78 kHz and 455 kHz
- Transmitting LEDs: 2
- Universal IR Code Database: yes
- Number of Brands in Database: over 250

Product highlights

One Remote For All Your Home Cinema Equipment

The ProntoNEO goes beyond being a 'replacement' for a table full of remotes; it's the ultimate control center for the most demanding film fans and music lovers. You can customize its user interface to suit your personal requirements by adding buttons, changing layouts and creating macros. It works with all IR controlled audio and video equipment – including color TVs, DVD players and recorders, satellite receivers, digital set-top boxes, VCRs and multi-channel 'surround sound' HiFi systems.

Dynamic Touch-Screen LCD Display For Easy Operation

The NEO's touch-screen display brings the benefit of personalized 'one-touch' operation to your home cinema. Forget about a table full of separate remotes! The more common functions also have direct access 'hardware' buttons for maximum ease-of-use. And the whole unit features cool blue backlighting for extra convenience in darkened rooms.

Create Your Own Custom Buttons and Macros

You can control everything from the direct-access touch-screen. ProntoNEO is supplied with a logical standard display layout, although this is easily modified to suit you. The unlimited macro facility allows you to create a series of as many commands or keystrokes as you like under a single button. And with 1MB of flash memory, you can program as many macros and commands per macro as you're ever likely to need.

Upgradeable Via the PC For Future-Proof Programming

With the easy-to-use NEOedit software, which is supplied on CD-ROM and available via the Internet, you can create or change layouts, import graphics such as network logos and create macros using your PC. The Philips Pronto website also keeps you updated with the latest features, making ProntoNEO future proof!

Built-In Database and Self-Learning Capability Covers All Brands

With a database of IR control codes for more than 250 brands, the ProntoNEO controls virtually every IR remote controlled product – regardless of brand. It also includes a powerful self-learning capability for copying more exotic functions from the original remote. You get peace of mind and absolute compatibility with virtually every IR remote control on the market – now and in the future.
